1.3. If the same vessel disembarks or tranships passengers or cargo successively in different zones of the port, it shall be subject to ship dues only once, in whichever of these zones where the rate is the highest. The vessel type, as well as the modulations and abatements to which it is subject, are determined by considering all the landing or transhipment operations carried out by that ship in the port.

The same provisions apply when the same ship has to board or tranship passengers or cargo successively in different zones of the port.

1.4. When a ship does not land or tranship passengers or cargo, and boards neither passengers nor cargo, ship dues are paid only once.

1.5. Ship dues are paid only once, when the ship departs:

- if the ship does not carry out any commercial operations;
- if the ship only carried out bunkering, refuelling, or unloading operations for ship-generated waste and cargo residues. In this case, the dues are set at **€0.00635per m³**.

A forced stopover occurs when a ship must put into port due to an event linked to the sea voyage, such as collision, technical damage or fire. Where the authorities oblige a ship to enter a port, this is not considered a forced stopover.
- ships, which, while unable to access a port facility are forced to carry out their landing, boarding or transhipment outside the port
- vessels assigned to cultural or humanitarian missions or missions of general interest for maritime heritage.

1.7 • As provided by Article R.5321-51 of the Transport Code:

- the minimum amount of port dues that will be collected is set at **€28.64**

¹ Any indivisible object weighing 50 tons or more and which can only be handled as a whole, that is, in one go. Cargo dues for a unit package greater than or equal to 50 t is equal to its weight multiplied by the rate (in euros per tonne) of the category to which it belongs. Thus, cargo dues for a package weighing 75 tonnes will be worth $75 * 2.3505 = 176.29 \text{ €}$.

** In application of the provisions of Article R.5321-22 of the Transport Code

(1) This flat rate tax replaces the taxation of cargo transported according to the category to which they belong.

(2) Heavy parcels transported by RORO ships are subject to the pricing for heavy parcels (see page 8).

ARTICLE 8: Conditions for payment of dues in the table of Article 7

8.1 • For each declaration, the dues set out in Table 1 of Article 7 of this tariff shall be levied on the total weight of the cargo belonging to the same category:

a) They are paid:

- By the tonne, when the weight is greater than 900 kg;
- By the quintal, when this weight is equal to or less than 900 kg.

Any fraction of a tonne or quintal is counted as one unit.

The payment of dues by the quintal is equal to one tenth of the payment of dues per tonne

b) Subject to exemptions applicable to frames, containers and pallet boxes, packaging shall, in principle, be charged at the same rate as the merchandise contained therein. However, where a declaration relates to merchandise belonging to more than one category, all packaging is automatically classified in the dominant category by weight.

8.2 • Declarations indicate the total gross weight and taxable weight per category for cargo subject to dues by gross weight, and must indicate a number for goods, vehicles or containers subject to dues by unit.

In support of each declaration for goods belonging to more than one category, the declaring party must attach a summary slip showing the weight or number per declared item and per category. This slip must be dated and signed by the declaring party.

8.3 • If all goods are subject to the same declaration by weight, the declaring party may request that they be subject as a whole to the rate applicable to the highest part. In that case, no summary slip is required; the declaration must simply mention the overall weight of all declared goods.

The absence of a summary slip is tantamount to the declaring party's acceptance of the simplified payment; no subsequent request for revision on the basis of the charge by category will be accepted.

8.4 • In accordance with the provisions of Article R. 5321-51 of the Code of Transport:

- The minimum charge is set at **€5.76** per declaration.
- The threshold charge is set at **€5.76** per declaration.

8.5 • Cargo dues are not payable in the cases listed in Article R.5321-33 of the Code of Transport. This includes products delivered for refuelling, rigging or fitting-out of ships as well as miscellaneous items belonging to the crews.

SECTION V

SHIP-GENERATED WASTE DUES

Payable to SPL Cherbourg Port

ARTICLE 11:

11.1- In the port of Cherbourg, dues are levied on all commercial vessels, fishing vessels and pleasure craft for ship-generated waste as defined in [Article L. 5334-7 of the French Transport Code](#). For pleasure and watersports craft, the ship-generated waste dues stipulated in [Article R. 5321-1 of the Transport Code](#) are only levied when the costs of receiving and disposing of the waste from these ships are not already covered by another charge or fee.

In marinas, waste disposal dues for ships other than those licensed for 12 passengers will be collected directly by the port authority, in accordance with [Article R. 5321-50-1 of the Transport Code](#).

These dues are payable by the shipowner or, in the case of pleasure craft, by its proprietor or skipper. They are calculated either on the volume V of the ship, expressed as indicated in [Article R. 5321-20 of the Transport Code](#), or on a flat-rate basis according to the following terms:

€0.0116 per m³

11.2 When ship-generated waste is delivered in accordance with the provisions of the Port of Cherbourg waste collection and processing plan, the service provider(s) performing the waste collection service mentioned in [Article R. 5334-5 of the Transport Code](#) issue a waste delivery receipt to the ship's captain or to the captain's representative. Before the ship leaves the port or as soon as the receipt is received electronically, the captain or the captain's representative transmits the information on the receipt to the authority responsible for port policing. Dues are payable on each port call irrespective of whether the ship delivers its waste or not. These so-called indirect dues cover the indirect administrative costs and all or part of the direct operating costs for at least 30% of the total annual direct costs corresponding to the actual delivery of waste in the previous year; taking into account the costs related to the predicted volume of traffic for the coming year is possible. The dues must be at least equal to the minimum charge stipulated in section VI hereof.

For waste referred to in Annex V of the MARPOL convention (solid waste) and passively fished waste, 100% of the costs of using the port receiving facilities are covered by the indirect dues such that a right to deliver waste is guaranteed without additional charges based on the volume of waste except where the volume of waste exceeds the maximum dedicated storage capacity indicated in the preliminary waste delivery notice. Where the volume of waste exceeds the maximum dedicated storage capacity, the actual costs for the part exceeding the storage capacity will be invoiced. If applicable, an additional charge to cover the proportion of the direct operating costs not included in the dues may also be invoiced. This depends on the types and quantities of waste delivered by the ship. It also concerns the delivery of residues from exhaust gas cleaning systems, the costs for which are covered on the basis of the types and quantities of delivered waste. Where this service is not provided by the port, (an) outside service provider(s) may bill the ship directly for this service. In order to avoid the costs of collecting and disposing of passively fished waste being borne by port users only, the dues may take account of European Union, national or regional funding revenue, as specified in section VIII hereof. The breakdown of direct and indirect costs, as well as the net revenue from the public funding available in relation to waste management and fisheries, are specified in section VIII hereof. Depending on the delivery receipts transmitted, case a or b below applies to the ship. The port authority informs the customs service, as applicable:

a. If the ship has not transmitted a waste delivery receipt: where the shipowner or its representative has not provided a waste delivery receipt, waste dues are levied in accordance with [Article L. 5321-3 of the Transport Code](#).

b. If the ship has transmitted a waste delivery receipt: where the shipowner or its representative has provided a waste delivery receipt, and where the service has been provided by the port, waste dues are payable to the bodies mentioned in [Article R. 5321-16 of the Transport Code](#). These bodies reimburse the collector for the costs covered by the dues relating to the collection and disposal of the waste. Direct operating costs not included in the dues, and which would have been billed directly by the collector to the ship, are not concerned. Where the shipowner or its representative has provided a waste delivery receipt, and where the collection service has been performed by an outside service provider who has billed the ship directly for the service, dues may be paid back to the ship on leaving the port to avoid duplicate billing. In some cases, a sum corresponding to the port's administrative costs may be deducted. These terms may be specified in the waste collection and processing plan of the port concerned, and are determined by the port authority with the consent of the customs service.

11.3- Reduced and differentiated dues

Dues are reduced in accordance with [Article R. 5321-39 of the Transport Code](#) depending on:

- the ship's type of activity, especially where short sea shipping is concerned: short sea shipping being that which carries out "the movement of goods and passengers by sea between ports located in geographical Europe or between these ports and ports located in non-European countries with a coastline on an enclosed sea bordering Europe. Short sea shipping covers both national and international shipping activities, including feeder services, along coasts and to and from islands, rivers and lakes. It also includes maritime transport services between the Member States of the Union and Norway, Iceland and the States bordering the Baltic Sea, the Black Sea and the Mediterranean Sea" (extract from the European Commission's Second Biennial Progress Report of June 1999). With regard to waste management, the port may, depending on its geographical location, decide to include the shipping services between European Union ports and the Group of Additional Selected Ports in its waste collection and processing plan for short sea shipping. The Group of Additional Selected Ports includes those ports that are to be considered as EU ports for the purpose of the application of the storage capacity thresholds set out in Table 1 of Commission Implementing Regulation (EU) 2022/89 of 21 January 2022 laying down rules for the application of Directive (EU) 2019/883 of the European Parliament and of the Council as regards the method to be used for the calculation of sufficient dedicated storage capacity. The ports included in this group are all the ports located in Iceland, Norway and United Kingdom (including Isle of Man, Channel Islands and Gibraltar) and the Russian ports located in the Baltic Sea, or

- the ship's design, equipment and operation demonstrating that the ship produces reduced quantities of waste managed in a sustainable and environmentally sound manner according to the criteria laid down in section IX hereof pursuant to Commission Implementing Regulation (EU) 2022/91 of 21 January 2022 defining the criteria for determining that a ship produces reduced quantities of waste and manages its waste in a sustainable and environmentally sound manner.

Dues may be differentiated in accordance with [Article R. 5321-38 of the Transport Code](#) depending on the category, type, size of ship, provision of service to ships outside of the port's normal operating hours or the hazardous nature of the waste.

11.4- Increased dues

The schedule of port charges may provide for a 10% increase in waste dues where ships fail to comply with the waste delivery procedure according to the [provisions of Article L. 5336-1-4 of the Transport Code](#).

11.5- The ship-generated waste dues, defined in section I above, do not apply to the following:

- ships engaged in assistance to ships, especially for pilotage, towing, mooring and rescue work;
- ships engaged in waste recovery and pollution control;
- ships engaged in maintenance dredging, maritime signalling, fire-fighting operations and administrative services;
- ships making a forced call not engaging in any commercial operations;
- ships with no access to port facilities, forced to perform their unloading, loading or transshipment operations outside the port;
- warships and ships operated by the State for non-commercial purposes;
- ships undergoing repair

11.6 - Pursuant to the [provisions of Article R. 5321-51 of the Transport Code](#):

- the minimum charge is set at EUR 10.76
- the threshold charge is set at EUR 5.38

11.7- Exemption from dues laid down in [Article R. 5321-39 of the Transport Code](#) (optional provision). The beneficiary of port dues shall provide a list of exempt ships to the customs administration.

ARTICLE 12: This fee schedule shall come into force as stipulated in Article R.5321-14 of the Transport Code.
